(54) Title: METHOD FOR OBTAINING TRAFFIC INFORMATION USING BILLING INFORMATION OF MOBILE TERMINAL

(57) Abstract: The present invention relates to a method for obtaining traffic information using billing information of a mobile terminal. The method can prevent crosstalk between a vehicle on a highway and a vehicle on a local road parallel to the highway and obtain correct traffic information associated with the highway, when obtaining information indicative of a road traffic state in real time by obtaining a unique number of the mobile terminal from the billing information and tracking a moving time of a corresponding mobile terminal between base stations where the mobile terminal attempts a telephone call on the highway.
